SKIN STAPLE REMOVER

SMART REMOVER™

Scissor-style skin staple remover for taking out surgical skin staples once the wound has healed

HOW IT WORKS

1. Slide the lower jaw under the centre of the staple.
2. Squeeze the handles fully. The staple bends open and its legs lift out of the skin.
3. Lift the staple away and release it.

FEATURES

- Scissor-style handles for a controlled grip
- Stainless steel jaws
- Works with skin staples of other brands
